

Survival AFTER the Storm!

STAY ALIVE

Avoid these Deadly Hazards:

Carbon Monoxide (CO) Poisoning:

Never use portable generators, charcoal grills or camp stoves inside your home. CO is an "invisible killer" — you can't see it or smell it!

Keep generators at least 20 feet away from the home*.

Electrocution:

Stay away from downed power lines or anything they touch.

Never operate or touch electrical appliances, circuit breakers or outlets that are or have been in standing water. Have a qualified electrician check first.

Fire:

No lights? Use flashlights or battery operated lanterns instead of candles.

Gas Leaks:

If you smell gas, get out, then call 911.

Don't turn lights on or off or use electrical equipment.
