

MEETING LOG

PRODUCT: Clothing Storage Units

SUBJECT: F15.42 Tip Restraint Task Group meeting

LOCATION: Teleconference

DATE: 12/2/19

ENTRY DATE: 3/11/20

LOG ENTRY SOURCE: Michael Taylor

COMMISSION ATTENDEES: Michael Taylor, Suad Wanna-Nakamura, Kristen Talcott, Max Sanborn, Chuck Smith, David Miller

NON-COMMISSION ATTENDEES: 15.42 Tip Restraint Task Group

MEETING SUMMARY:

Members of the group discussed the addition of a dynamic test to F3096 using a hinged, weighted fixture to simulate an impulse force that a tipover event could create. The task group chair would like to conduct a workshop sometime in the future to test various methodologies on actual tip restraint samples. The group agreed that more research into the design variations of tip restraint and methodologies is needed before scheduling a workshop. In preparation for the next meeting several members will research different designs of tip restraints for discussion at the next task group meeting.
