

MEETING LOG

SOFT INFANT AND TODDLER CARRIERS TASK GROUP CALL

October 5, 2018

October 9, 2018

CPSC Attendees: Celestine T Kish, ESHF; Hope Nesteruk, ESMC; Keysha Walker, EXC.

Non-CPSC Attendees: Eric Childs; Paul Ware; Laxmi Ravikumar; Meredith Thomas; Piyush Shah; Sal Messina; and Lana Perez. This may not be a complete list, please contact ASTM for non-CPSC attendees.

SUMMARY: Laxmi Ravikumar started the meeting explaining the background for the request to change the referenced test from F963 Toy Standard. Hope Nesteruk then provided background information about the sling standard and the difference between the two flammability tests. The Task Group (TG) members discussed the different tests and how they apply to soft infant and toddler carriers. The TG determined that the references as currently written are correct and no changes are needed. Further discussion led to the decision to propose adding examples to explain the two testing requirements. Eric Childs will present examples at Subcommittee meeting in October. The meeting adjourned.
