DATE: November 6 and 7, 2018

ENTRY DATE: February 15, 2019

LOG ENTRY SOURCE: *Kevin Lee, ESMC*

COMMISSION ATTENDEES:

NON-COMMISSION ATTENDEES: Contact ASTM for list of attendees

MEETING SUMMARY:

The group discussed that changes to the requirements for fall height for overhead climbers are not needed. The group believes that the vertical support posts are exempt from 8.3.6 requirements except for any horizontal beam.

A task group on trolley and track rides wants to address the hazards of new track ride designs while making sure current products remain compliant. The task group discussed that more maintenance will be required around a track ride compared to a static product. The group discussed setting a maximum speed of the trolley mechanism to be 16.4 ft/s (5 m/s). This speed was derived from the track and field results of a 100 m dash from Atheltic.net. The times recorded for 7th and 8th graders ranged from 3.7 to 6.9 m/s

The next meeting is in May 2019 at the Sheraton hotel in Denver
