

U.S. Consumer Product Safety Commission Log of Meeting

SUBJECT: ASTM F2057 Loaded and Multiple Drawer Testing Task Group Workshop
(Furniture Tipover)

LOCATION: Advanced Furniture Testing Lab in Holland, Michigan

DATE: 9/26/2019

ENTRY DATE: 10/21/2019

LOG ENTRY SOURCE: Michael Taylor

CPSC ATTENDEES: Michael Taylor, Kristen Talcott, Suad Wanna-Nakamura, Max Sanborn

NON-CPSC ATTENDEES: Multiple/Loaded Drawer task group members

MEETING SUMMARY:

A manufacturer provided 7 Clothing Storage Unit (CSU) samples to the group for the workshop. They ranged in design from 3 drawer tall to 6 drawer double wide with additional storage behind 2 small doors. The group discussed and conducted different test methodologies using multiple open drawers and various loading inside the drawers in addition to the 50lb test fixture. Several manufacturers discussed their internal test methods used to account for children's interactions with CSUs. The results were recorded and will be shared with the task group and discussed further at the next meeting.
