

**LOG OF MEETING  
DIRECTORATE FOR ENGINEERING SCIENCES**

**SUBJECT:** Meeting of the ASTM F15.71 Liquid Laundry Packets

**DATE OF MEETING:** October 6, 2020

**PLACE OF MEETING:** Virtual (teleconference)

**LOG ENTRY SOURCE:** Jill Hurley (ESHF)

**COMMISSION ATTENDEES:** Jill Hurley (ESHF), Adrienne Layton (HSPP),  
Joanna Matheson (HSTR), James Tark (EPHA)

**NON-COMMISSION ATTENDEES:** Contact ASTM for a full list.

**SUMMARY OF MEETING:**

Subcommittee members met to review laundry packet exposures for the year 2019 involving children under the age of 6 years. Data was presented by Ms. Kate Reynolds, from the Rocky Mountain Poison and Drug Center on behalf of the American Cleaning Institute, and by Mr. James Tark from CPSC. Incidents were compared to the baseline year of 2012 and post implementation periods of 2017 through 2019. Next, the Scope Task Chair, summarized the task group's last meeting and invited Ms. Kate Reynolds to present the unintentional liquid laundry packet exposures in populations 50 years and older. Review of CPSC data for this adult population is pending submission.

The Subcommittee task chair requested all task groups meet to discuss the data presented at this meeting to determine if proposals will be put forward to ballot revisions to the ASTM F3159 standard. The standard is up for renewal and the subcommittee will need to determine the outcome.

The next meeting will be scheduled after all task groups have met.
