SUMMARY OF MEETING:

The task group discussed the 12/11/19 letter CPSC staff sent to the task group lead discussing further testing of a mattress that compressed when sheets were installed. CPSC staff discussed the results of our testing. The task group asked questions and requested that we share our test data. Others on the call were encouraged to do their own testing and report back. A hands-on, in-person meeting as a next step was again discussed, but no firm plans were made.
