Summary of Meeting:

This working group has been established to recommend possible changes to harmonize requirements and remove inconsistencies between ASHRAE 15, ASHRAE 15.2P, and UL/CSA 60335-2-40. While no voting will occur in this meeting, the group will look for general agreement from all participants.

This meeting continued on from where the May 6 meeting left off and will continue on a regular basis every 3 weeks until August.

The working group discussed recommendations from a sub-group that is developing a refrigerant detection proposal.

The working group will next meet on Wednesday June 17, 2020.
