Summary of Meeting:

This working group has been established to recommend possible changes to harmonize requirements and remove inconsistencies between ASHRAE 15, ASHRAE 15.2P, and UL/CSA 60335-2-40. While no voting will occur in this meeting, the group will look for general agreement from all participants.

The meeting began by continuing to review a proposal for harmonized Refrigerants Detection System (RDS) requirements developed by a sub-group. The proposal had been shared previously, but the working group was not able to review the entire document.

The working group will next meet on Wednesday August 19, 2020.
