### **SUMMARY OF MEETING:**

CPSC staff attended the joint ASTM F15.53 and F15.55 working group meeting for ASTM F2369, *Standard Safety Specification for Non-integral Firearm Locking Devices*, and ASTM F2456, *Standard Specification for You-Resistant Firearms Containers (YRFCs)*, respectively. The working group discussed the negative ballots received for both standards. One negative ballot related to the specifications for the handgun analog mass proposed to be added to the drop test for YRFCs was found to be persuasive. A task group will be formed to discuss the matter. The next working group meeting and task group meeting is TBD.
