**SUBJECT:** CSA Decorative Gas Appliance Smart Enabled Task Force meeting

**FY 23 OP PLAN ENTRY:** Liquefied Petroleum (LP) Gas Appliances

**DATE OF MEETING:** 09/05/2023

**LOCATION OF MEETING:** Virtual

**CPSC STAFF FILING MEETING LOG:** Yeon Kim

**FILING DATE:** 09/19/2023

**CPSC ATTENDEE(S):** Yeon Kim, Division of Electrical Engineering and Fire Sciences

**NON-CPSC ATTENDEE(S):** Contact CSA for a list of attendees

### Summary of Meeting:

Contact CSA for more details on this meeting.

This is a joint task force (TF) for the Decorative Gas Appliances technical subcommittee (TSC) and the Vented Heater TSC to discuss the additional requirement for smart enabled features.

The TF continued to discuss smart-enabled features requirements. The TF discussed the loss of communication during remote control operation of products covered under ANSI Z21.86 *Vented Gas-Fired Space Heating Appliances* and ANSI Z21.88 *Vented Gas Fireplace Heaters*. The TF discussed the 30 minutes timing for the reconnection/user notification and 60 minutes for the safety shut off. In particular, the smart module in the appliance will send a notification and try to reconnect when the communication between the appliance and a device is lost for 30 minutes. Then it will shut down the appliance if there is still no communication at 60 minutes. CPSC staff monitored the discussion.

### Next Steps:

The next TF meeting will be scheduled after the TSC meeting on October 4<sup>th</sup>.
