

MEETING LOG

MEETING TITLE/SUBJECT: ASTM F15.45 Candle Test Method Task Group Meeting

OP PLAN ENTRY: Candles and Candle Accessories

DATE OF MEETING: March 26, 2024

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers

FILING DATE: March 26, 2024

CPSC STAFF ATTENDEE(S): Scott Ayers (ESEF)

NON-CPSC ATTENDEE(S): Contact ASTM for a complete list of attendees.

Summary of Meeting:

Contact ASTM for more details of this meeting. This was a meeting of a task group to potentially develop a new standard for automated candle testing. A manufacturer has developed a machine that automates candle testing and was exploring the possibility of developing a standard for it.

The task group discussed developing a new standard. Staff suggested that a new standard would need to focus on a general test method for automated candle testing, rather than a product specification or standard operating for any specific devices. Other participants had concerns if a new standard did not reference the existing standard for candles. After discussion, the task group chair will email participants to see if there is a desire to continue the work.

Next Steps:

Staff will monitor any progress with the task group, however the general sentiment of participants appeared to be not pursuing a new standard.
