### **Summary of Meeting:**

Contact CSA for more details about this meeting.

This was a meeting of the TSC. The agenda focused on reviewing CSA editorial staff suggestions on the draft of the first amendments to both ANSI Z21.58 and ANSI Z21.89. The first amendments will include requests for change already agreed to by the TSC and modifications to the wind testing.

The editorial staff suggestions were all meant to improve understanding and clarity of the draft. Included among the suggestions were temperatures ambiguities which staff provided thought on. The TSC agreed and the changes were deemed editorial and accepted into the draft. Other editorial changes were made.

The TSC also reviewed two requests for change, each for ANSI Z21.58 and ANSI Z21.89. Both were proposed by CSA testing staff and agreed to by the TSC. One focused on clarifications to the manual valve requirements in ANSI Z21.89 and the other focused on manual valve leakage requirements in ANSI Z21.58.

CSA staff will review the current draft and will issue a 60-day ballot if other issues are not identified. CSA staff expects the amendments to be published sometime between October and December 2024.

### **Next Steps:**

Staff will review the ballot when available.
