This meeting was led by the Chair of the task group, Jarrod Kuhn, Sterno. A summary of the meeting is below.

- The task group went through the standard to ensure that the product, candle, was covered since we added this product to the scope last after developing requirements for torches and oil lamps.
- The group began to discuss labeling requirements. Lamplight was concerned about the requirements for conspicuousness. The Lamplight member suggested a hangtag that directed consumers where to look for the warning.
