SUMMARY OF MEETING:

Background: ASTM WK70724 is a draft new voluntary standard for commercial electric-powered scooters for adults. It was formed in January 2020 and CPSC staff are active participants of this task group. A working group within the task group was formed to address hazardous substances regarding e-scooters. This meeting was the first meeting to discuss these issues.

Activity: CPSC staff raised the issue of e-scooters thrown and submerged in waterways, which was seconded by task group members. The subcommittee chair will provide resources, including California's Proposition 65 and the Federal Hazardous Substance Act, for the task group to review and prepare for the next meeting. The ASTM manager is looking for manufacturers to join the working task group.

Next Steps: CPSC staff to review provided resources to prepare for the discussion next meeting.
