

Safety in the Storm!

NEWS | LIVE

When Hurricanes Happen

Be Informed, Prepared, and Safe!

Carbon Monoxide (CO) Poisoning:

Never use a portable generator or charcoal grill inside your home.

CO is an “invisible killer” – you can’t see it or smell it!

Keep generators at least 20 feet away from the home.

Electrocution:

Stay away from downed power lines or anything they touch.

Never touch electrical appliances, circuit breakers or outlets that are or have been in standing water.

Have a qualified electrician check first.

Fire:

No lights? Use flashlights or battery operated lanterns instead of candles.

Gas Leaks:

If you smell gas, get out, then call 911.
