MEETING SUMMARY: The purpose of this meeting was the proposed resolution of comments to the draft international standard ISO 8124-10: Safety of Toys – Experimental sets for chemistry and related activities. The document is intended to reduce the risks and health hazards to children when experimental sets involving chemical experiments are used as intended or in a foreseeable way, bearing in mind the behavior of children.

Comments to the draft ISO/DIS 8124-10 were reviewed and resolved. The final draft will be updated with proposed comment resolution and completed by 12-30-22 for final review and subsequent publication.
