**Prepared By:** Zachary Goldstein

**Date of Log:** 12/22/22

**Attendees:** Contact UL for a complete list of attendees

**CPSC Attendees:** Vineed Dayal, Zachary Goldstein, Julia Kerns, Simon Lee & Greg Ota

### **Meeting Summary:**

Contact UL for more details of this meeting.

This was a weekly meeting for Task Group (TG) work. This week's work focused on TG6, Functional Safety, TG7, General Testing, TG8, Manipulators, and TG9, Vulnerable Persons.

TG6 continued modifying some test in the functional safety clause.

TG7 recapped the work done last week. Following this recap its members considered additional testing conditions and considered incorporating ODD environments and obstacles into its testing makeup.

TG8 is still waiting on information from outside sources and yielded the remainder of their working time.

TG9 presented what its members discussed at their previous TG9 meeting to the rest of the TG's present. CPSC staff questioned how changing wording in the vulnerable persons annex would translate to the rest of the document and was informed that as a normative annex then at whatever points in the body of the document it becomes relevant that a robot would need to meet the criteria of that body, and of the annex, too.

The next scheduled meeting for TG work is scheduled for 10/11/22.
