Dear Mr. Bukofzer:

This is in response to your letter of July 23, 1974, requesting a definition of "tread surfaces" of the Commission's bicycle safety regulation for toe clips (16 CFR 1512.7(b)). A tread surface is "a surface over which a shoe sole moves or treads." It is anticipated that a Pedal Slip Test, Section 1512.18(f), will be proposed in the near future. The proposed rule further defines the tread surface and comments on the proposal will be invited.

Sincerely,

/s/

Michael A. Brown
General Counsel

CABLE ADDRESS JAMESEED

IN REPLY REFER TO:

July 23, 1974

Mr. Sadye E. Dunn
Secretary - Consumer Product Safety Commission
5401 Westbard Avenue
Bethesda, Maryland

Dear Sir:

We have reference to the Consumer Product Safety Commission's Safety Standards for Bicycles published in the Federal Register on July 16, 1974, Volume 39, No. 137, Part II.

We would like to specifically refer to Page 26107, Paragraph 1512.7, Subparagraph B - Toe Clips - "Pedals designed for optional use of toe clips shall have tread surfaces".

Would you be good enough to give us an explanation for your definition of "tread surfaces".

Your clarification would be very much appreciated.

Cordially yours,

WILCOX INTERNATIONAL CORPORATION

H. Bukofzer
Executive Vice President
Administration
