

Magnets—For children under age six, avoid building sets with small magnets. If swallowed, serious injuries and/or death can occur.

Small Parts—For children younger than age three, avoid toys with small parts, which can cause choking.

SHOP SMART, SHOP SAFE

Ride-on Toys—Riding toys, skateboards and in-line skates go fast and falls could be deadly. Helmets and safety gear should be sized to fit.

Projectile Toys—Projectile toys such as air rockets, darts and sling shots are for older children. Improper use of these toys can result in serious eye injuries.

Chargers and Adapters—Charging batteries should be supervised by adults. Chargers and adapters can pose thermal burn hazards to children.
